

Editorial Note: The Future of AI and Sustainability in Africa

Author: Dr. Aruna M. Jarju

Welcome to Volume 1, Issue 1 of the Journal of Climate Innovation and Technology (JCIT). This issue focuses on the growing role of artificial intelligence, sustainability, renewable energy, and emerging technologies in addressing environmental and developmental challenges across Africa and the global community. Artificial intelligence and innovative technologies continue to transform environmental monitoring, smart agriculture, climate prediction, and sustainable development strategies. Through this issue, JCIT aims to provide a platform for researchers, scientists, and academicians to share valuable research findings and technological advancements that contribute to global sustainability and climate resilience. We sincerely appreciate the contributions of all authors, reviewers, and editorial members who supported the successful publication of this issue. We hope that the published articles will encourage future research, innovation, and international collaboration in climate innovation and sustainable technologies. Thank you for supporting the Journal of Climate Innovation and Technology (JCIT).
